

Fresh Films Interactive Assemblies

Fresh Films – a program of Augustana College - uses the magic of Hollywood to transform the way students think about their future careers. Through hands-on demos, students will see well beyond director or actor to the hundreds of careers in the film industry - from sound engineering to animation and effects - careers that combine art with science, engineering and technology.

Assembly Details

Fresh Films Assemblies average 2.5 hours and include:

- Screening of the Fresh Films teen-created film:
 - **ABOUT THE FILM: “Alternate Universe: A Rescue Mission”**
Three teens whose science project opens the door to another world! The film stars Steve Guttenberg and premiered at a White House Education event this past fall.
- Hands-on demos with students in camera, filming and effects
- Exploration of 2D and 3D animation, sound and production design
- Q&A and discussion
- A career exploration guide profiling STEM/STEAM jobs in the entertainment industry
- Schools need to supply the projector screen and speakers; Fresh Films brings the rest.

Which Students?

We’ve hosted over 40 assemblies to date! Assemblies are best for 4th-12th graders and can be “single grade level” or “school wide events”. We can also do smaller events, but we always recommend events go beyond just “art” or “film” kids as new students are often sparked by the content!

We have (3) participation levels

- Book an anytime screening on a date and time that work best for your school at a cost of \$2,000 (for 400 students that’s only \$5 per student).
- Book during our tour windows for only \$850
- Host your own event for just \$300. For this, we’ll send you a DVD and interactive presentation for a teacher host the event

Upcoming Assembly Tours:

Discounted events are available during our upcoming tours. Schools select early morning or late morning start times:

- Midwest Tour: September & October (IL, IN, IA, MN, OH)
- Northeast Tour: October & November (NY, NJ, CT, RI, MA)
- Mid-Atlantic Tour: October & November (DC, MD, VA, DE)

What teachers are saying about FF assemblies:

“It’s a great way to engage our students and meet NextGen standards.”

– Erin Kading-Davis, 8th grade science, Wentworth Junior High School

“It’s pushing a new narrative that STEM is everywhere ...somebody had to use science and technology skills to create that production of your favorite show.”

– Lauren Mims, White House Initiative on Educational Excellence for African Americans

OMG, I cannot thank you enough for such a fabulous assembly. Students have been coming into my class saying it was the best morning of school ever!!

Participating Schools Include:

- Chicago Public Schools •
 - Charles Barrow STEM school •
 - Gompers Jr. High •
 - Von Steuben Metropolitan •
 - Science Center •
 - Turning Point Academy •
 - Richfield Middle School •
 - Creative Arts Secondary •
- And many, many more!**
